Orchestra Meccanica Marinetti (OMM) is a pilot project part of the Action Sharing initiative (Share Festival Torino), about innovation, art and technology.

- OMM is about a raw robot percussion orchestra, controlled in real-time from a performer
- Real oil cans are used to produce rhythms, like a sort of cyborg Tambours du Bronx team
- Some gestural controllers (as the Gypsy Sonalog) will be used to direct the play
- The project is at the moment a work in progress in the mecatronics labs in the Politecnico of Turin
